

BSA Section 63 Compliant Evidence Export

Generated: 9/13/2026, 6:12:09 PM

Executive Summary

Funds originating from a reported investment scam were laundered through a multi-layered network of intermediary Ethereum wallets to obscure their origin. The trace identified six distinct paths, with the primary and shortest path funneling stolen assets into Binance within three hops. Formal law enforcement intervention is now required to request account holder details and freeze linked assets at the receiving exchange.

Identified Cash-Out Point

Exchange: Binance

Deposit Address: 0x28c6c06298d514db089934071355e5743bf21d60

Estimated Value: Unknown

Modus Operandi & Layering

1. Initial illicit proceeds were rapidly moved from the victim-reported address into intermediate pass-through wallets within 15 minutes to evade basic monitoring.
2. The perpetrators utilized fan-out layering techniques, splitting funds across multiple intermediary nodes to diffuse transaction taint.
3. Staging wallets were positioned two to three hops away from major off-ramps to consolidate transactions prior to exchange deposits.
4. Assets were ultimately directed into central deposit addresses associated with Binance, Gate.io, Kraken, and OKX for potential fiat cashing out.

Chain of Custody (Path Nodes)

Draft Subpoena / Preservation Notice

LAW ENFORCEMENT PRESERVATION AND DISCLOSURE NOTICE

TO: Binance Legal Compliance / Law Enforcement Requests Unit

SUBJECT: Emergency Preservation and Account Identification Request - Illicit Proceeds Investigation

Under applicable statutory authority and international legal assistance protocols, you are hereby requested to immediately PRESERVE and DISCLOSE all account records, transaction logs, and identifying information associated with the following deposit address:

Target Deposit Address: 0x28c6c06298d514db089934071355e5743bf21d60

REQUIRED DISCLOSURES:

1. Complete Know Your Customer (KYC) records for the account holder, including full legal name, date of birth, residential address, verified government ID images, phone numbers, and email addresses.
2. All linked financial infrastructure, including verified bank account details, credit/debit card details, and connected third-party payment processors.
3. Complete transaction history and audit trail for the account, including deposit/withdrawal logs, trading history, internal transfers, and fiat conversion details.
4. Access logs, including IP addresses, timestamps, device identifiers, and geo-location data from account creation to present.
5. Immediate temporary restriction/freeze of any remaining digital assets associated with this account pending formal judicial freezing orders.

Failure to comply or premature disclosure to the account holder may compromise an ongoing criminal investigation.
