

BSA Section 63 Compliant Evidence Export

Generated: 9/13/2026, 5:30:19 PM

Executive Summary

Following an investment scam report, victim funds were traced from the initial wallet through a multi-layered chain of intermediary Ethereum addresses. The funds were dispersed across seven distinct transactional routes utilizing high-velocity transfers to obfuscate the paper trail. The primary cash-out destination was identified as centralized exchange deposit infrastructure managed by Binance.

Identified Cash-Out Point

Exchange: Binance

Deposit Address: 0x28c6c06298d514db089934071355e5743bf21d60

Estimated Value: Unknown

Modus Operandi & Layering

1. Victim funds were initially transferred from the reported address to primary staging wallets within 1 to 2 hops of the originating transaction.
2. The perpetrators utilized high-velocity layering techniques, rapidly re-routing funds through intermediary smart contracts and pass-through addresses within short timeframes.
3. The illicit proceeds were split across multiple routes to diffuse taint, ultimately consolidating into direct exchange deposit addresses linked to centralized services, predominantly Binance.

Draft Subpoena / Preservation Notice

FORMAL LAW ENFORCEMENT PRESERVATION AND DISCLOSURE NOTICE

TO: Binance Compliance & Legal Investigations Unit
SUBJECT: Emergency Account Preservation and Transaction Information Request
INVESTIGATIVE MATTER: Investment Fraud Investigation
TARGET ADDRESS / DEPOSIT ENTITY: 0x28c6c06298d514db089934071355e5743bf21d60 (Binance 14)

Under applicable statutory authority and international legal assistance frameworks, you are hereby requested to immediately preserve and disclose all recorded metadata, account files, and transactional records associated with incoming transfers to the target address originating from trace path nodes linked to victim wallet 0x355b7A2a04Ff5160e996a0E553BCA57aAf8Bb6a4.

REQUIRED RECORDS INCLUDE:

1. Full Know-Your-Customer (KYC) records for the underlying user account(s), including full legal name, date of birth, physical residential address, verified phone numbers, email addresses, and copies of government-issued identification.
2. Complete transactional history, including fiat deposit/withdrawal records, linked bank account numbers, credit card details, and external cryptocurrency withdrawal addresses.
3. Technical metadata including registration IP addresses, login IP logs with timestamps, device identifiers, and user session data.
